📄 Summary About Me

I started to create websites when I was in 7th grade. I played with MyBB [🔗](#) and Wordpress [🔗](#). I built lots of different websites and earn some money with advertises.

Since that time I am really into with computers that's why I am studying computer engineering.

In university I've studied with C, C++ and C# programming languages. Beyond this languages I used MySQL as database.

From February 2020 I'm studying web programming. I made projects with Sass, Vanilla JS, React and tools with React. You can find all my projects in my Github profile.

📁 Professional Experience

07/2015 – 09/2019
Çeşme, İzmir

Accountant
Paparazzi Restaurant-Bar

I worked every summer during my university education. In this company there were more than 80 people who was working, result of that I improved myself with several topics.

First of all I managed my own economy and I learned to how to make realistic plans. Other important skill that I won is learning how to talk with people and how to work with a team. We were 5 people worked together that's how I learned how to communicate with people that I work together.

I was the person that talks with companies about products and prices. These are the experiences that I earned from this work

🎓 Education

09/2015 – 03/2021
Eskişehir, Turkey

Eskişehir Osmangazi University [🔗](#)
Bachelor

I was part of society and tried to learn new things from community that we created. I make great friendships and improved my social skills

Board Member

I was active member of this club before after that I became the one of the board member of our university club. We organized couple of great organizations.

2018 – 2019

Bilişim Günleri 2018-2019

Organization Vice President

It's an organization that gives chance of students to meeting people who are expert of their job and well known in market. Our aim is to introduce the market and gives the students chance to introduce themselves to experienced people. I was involved this organization team in 2018 and 2019.

03/2019

Women Techmakers Eskişehir

Organization Team Member

From 2014 to present, Women Techmakers is continually launching global scalable initiatives and piloting new programs to support and empower women in the industry. In 2019 we host this organization on our university and I was the part of the team

Projects

07/2020 – 08/2020

Keyorganik

Me and my friend designed and coded landing page for a company called Key Organik Tavukçuluk. We coded this site with pair programming. In this site we used Sass and vanilla JS.

Skills

Javascript
ES6+

React

- Router
- React Bootstrap
- Styled-components

Sass

Interests

Play Chess  (When I was in primary school I started to play chess. I'm not into chess now like that times but still it's one of my hobbies. I attend couple of chess tournaments in primary school and high school.)

Listening EDM (I love listening Electronic Dance music. It's my passion since high school.)
